Python program to check if a string contains any special character

```
import re
def run(string):
    regex = re.compile('[@_!#$%^&*()<>?/\|}{~:]')
    if(regex.search(string) == None):
        print("String is accepted")

    else:
        print("String is not accepted.")

if __name__ == '__main__':
    string = "NAYAN"
    run(string)
```
